Get the best exchange rate and take more of your money with you

Halo Financial is a foreign exchange brokerage that specialises in helping migrants get the best possible exchange rates for the transfer of their personal savings into NZ Dollars.

New country, new money

When migrating to New Zealand you will need to exchange your money into NZ Dollars. This will involve a currency transaction which will expose you to currency risk. It's essential to choose the right time to buy Dollars because if you don't pick the ideal exchange rate, you'll arrive with less of your hard earned money than you could have done. But time your transaction well and you'll take more of your money with you.

Tailored solutions

Halo Financial will patiently explain how fluctuating exchange rates affect your migration budget and will suggest the most appropriate strategies and solutions needed to maximise the value of your money. All of this will be delivered by your personal FX Consultant who you can rely on to take care of you and your foreign exchange needs.

Time it right

Halo Financial will help you get a much better exchange rate than you would get from a bank so you'll have more money to start your new life abroad. And to get the best exchange right it's all about timing.

If you had exchanged £200,000 into New Zealand Dollars in October 2009 you would have bought \$427,860. Had you waited till November 2009, £200,000 would have bought you \$465,980. That's a **gain of \$38,100 in less than 4 weeks and it's solely due to exchange rate volatility!**

Effortless

In foreign exchange there is no one size fits all solution. Halo Financial build long term relationships with their clients – really getting to know your personal circumstances so that they can deliver the best solution for you and your money. It adds up to a tailored service that always puts you first so that you meet your objective of arriving in your new country with as many NZ Dollars as possible.
